Professional Summary

Postgraduate student in Quality Management Science at Indian Statistical Institute with strong foundations in statistics, machine learning, and data analytics. Experienced in data cleaning, exploratory data analysis, statistical modeling, and predictive analytics using Python, SQL, and Excel. Interested in applying statistical modeling and machine learning to real-world analytical problems.

Education

Indian Statistical Institute (SQC & OR Unit) , Bengaluru	2025 – Present
M.S. in Quality Management Science	Percentage: 85.08%
Relevant Coursework: Statistical Process Control, Operations Research, Statistical Decision Making, Multivariate Data Analysis, Pattern Recognition, Deep Learning (Fundamentals)	
Institute of Science, Banaras Hindu University , Varanasi	2022 – 2025
B.Sc. in Mathematics (Honours)	CGPA: 8.53
Relevant Coursework: Statistical Inference, Numerical Analysis, Descriptive Statistics, Survey Sampling, Numerical Analysis, Operations Research	
Kendriya Vidyalaya , CTPS	2022
Higher Secondary (Science)	Percentage: 97%
De Nobili School , CTPS	2020
Secondary Education	Percentage: 97.64%

Internship Experience

Data Analysis Intern <i>CGI, Bengaluru</i>	May 2026 – July 2026
--	----------------------

- Performed data cleaning, preprocessing, and exploratory data analysis using Python and Excel.
- Conducted statistical analysis on structured datasets to derive actionable business insights.
- Developed reports and visualizations to support data-driven decision-making.
- Collaborated with cross-functional teams to analyze business requirements and data trends.

Projects

Customer Churn Prediction using Machine Learning

- Performed data preprocessing, feature engineering, and exploratory data analysis on customer behavioral data.
- Built and compared Logistic Regression and Random Forest models for churn prediction.
- Achieved 80.4% classification accuracy using Logistic Regression and evaluated performance through precision, recall, F1-score, and confusion matrix.
- Identified key churn drivers including contract type, tenure, internet service category, and payment method through coefficient analysis.

Supplier Risk Prediction using Machine Learning

- Performed data cleaning, preprocessing, and feature engineering on supplier quality data.
- Conducted exploratory data analysis to identify key drivers of supplier risk.
- Built a Logistic Regression model for supplier risk classification.
- Evaluated model performance using confusion matrix, precision, recall, and F1-score.
- Identified key risk factors through coefficient analysis and feature importance interpretation.

Technical Skills

Programming: Python, SQL, Java, C

Data Analysis & Visualization: Pandas, NumPy, Matplotlib, Seaborn, Excel (Pivot Tables, Dashboarding), Power BI, Data Cleaning, Exploratory Data Analysis

Machine Learning: Scikit-learn, Logistic Regression, Supervised Learning, Feature Engineering, Model Evaluation

Statistics: Hypothesis Testing, Statistical Inference, Predictive Modeling, Statistical Analysis

Leadership Experience

Placement Representative Indian Statistical Institute (SQC & OR Unit)

- Coordinating with companies and startups regarding internship and placement opportunities.
- Facilitating communication between students, recruiters, and placement coordinators.
- Coordinated interview scheduling and candidate communication.
